

# IC Application Note No. P-15

<b>Title:</b>	<b>Separation of polysaccharides (inulin)</b>
---------------	---

<b>Summary:</b>	Separation of polysaccharides with increasing numbers of inulin units using gradient elution and pulsed amperometric detection.
-----------------	---

<b>Sample:</b>	Extract of "endivia" radix
----------------	----------------------------

<b>Standard:</b>	Inuline from "dahlia tubers" and "chicory"
------------------	--

<b>Column:</b>	6.1005.300 Metrosep A SUPP 1
----------------	------------------------------

<b>Eluent A:</b>	100 mmol/L sodium hydroxide, 10 mmol/L sodium acetate
------------------	---

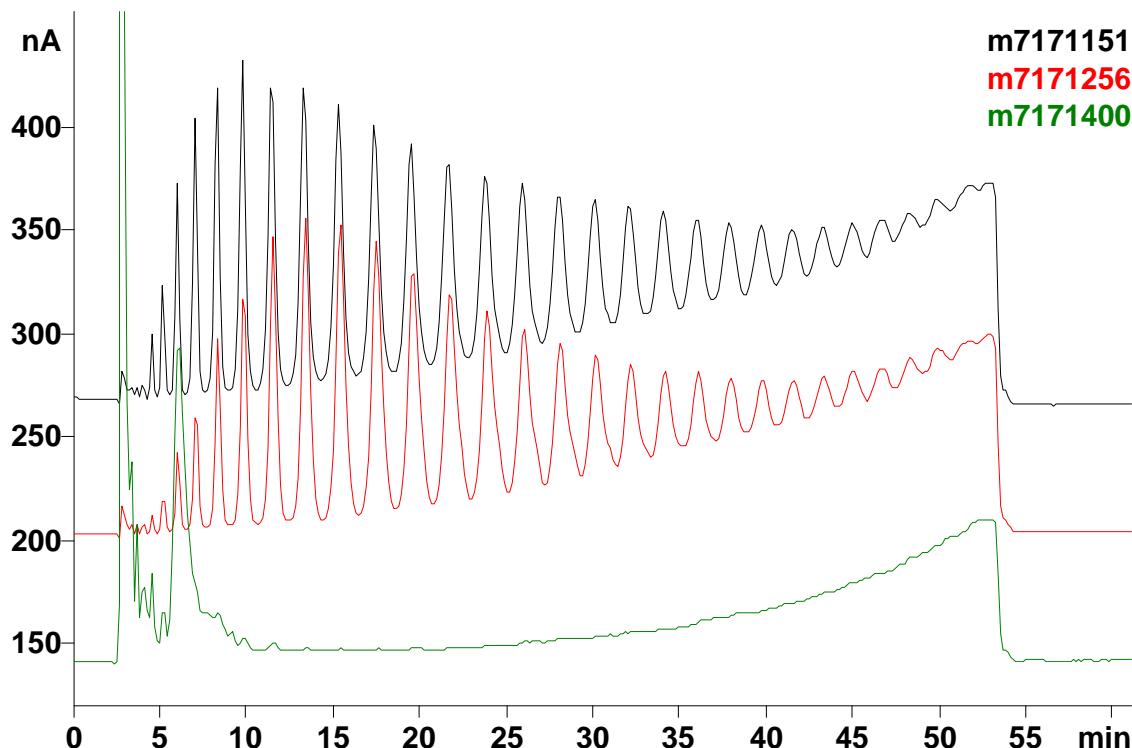

<b>Eluent B:</b>	200 mmol/L sodium hydroxide, 200 mmol/L sodium acetate
------------------	--

<b>Voltage:</b>	50 mV
-----------------	-------

<b>Temperature:</b>	32 °C
---------------------	-------

<b>Flow:</b>	1.0 mL/min
--------------	------------

<b>Injection Volume:</b>	20 µL
--------------------------	-------

m7171151: 3 g/L chicory inulin

m7171256: 3 g/L dahlia inulin

m7171400: Endivia extract diluted 1:25
