

# IC Application Note No. S-224

<b>Title:</b>	Sulfate in gentamicin sulfate
---------------	-------------------------------

<b>Summary:</b>	Determination of sulfate in gentamicin sulfate applying anion chromatography with conductivity detection after chemical suppression.
-----------------	--

<b>Sample:</b>	Gentamicin sulfate (SIGMA no. G1264)
----------------	--------------------------------------

<b>Sample Preparation:</b>	Direct injection of 20 mg/L solution
----------------------------	--------------------------------------

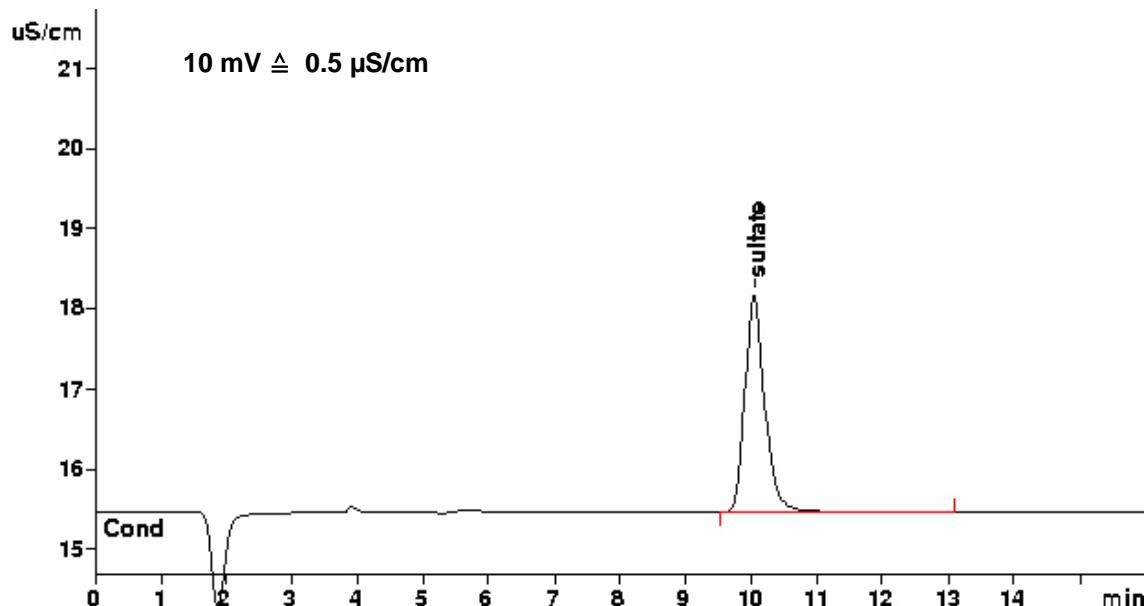

<b>Column:</b>	6.1006.510 Metrosep A Supp 5 – 100
----------------	------------------------------------

<b>Eluent:</b>	3.2 mmol/L sodium carbonate 1.0 mmol/L sodium hydrogencarbonate
----------------	--

<b>Suppressor:</b>	Metrohm Suppressor Module (MSM, 100 mmol/L sulfuric acid)
--------------------	---

<b>Flow:</b>	0.7 mL/min
--------------	------------

<b>Injection Volume:</b>	20 µL
--------------------------	-------

<b>Results:</b>	Sulfate
-----------------	---------

Mean (n = 6)	6.01 mg/L
--------------	-----------

Relative standard deviation (%)	0.10
---------------------------------	------

Content in %	33.3 %
--------------	--------

See Application Note P-32 for the determination of gentamicin in gentamicin sulfate.
