

Dream of your sensor and together we will make it true

Custom production and high volume manufacturing of electrochemical solutions

FIND THE BEST SOLUTION FOR YOUR RESEARCH...

- Customization of designs
- Maximum levels of reliability and product stability
- Complete solutions available
- No risk of lack of supply
- From short series to large manufacturing
- Short delivery times
- Metrohm Global Support from R&D experts

 **Metrohm**
DropSens

Push the boundaries in your electrochemical R&D!

A new way of making, designed and developed by researchers for researchers. From short series to mass production, find your best electrochemical solution with Metrohm DropSens' custom production and high quantity manufacturing capability.

We can help you from early discovery and during prototyping to reach a solution that meets your final needs and specifications. When working with Metrohm DropSens, the whole journey will come with depth, experience, flexibility and understanding.

UNDERSTANDING

Working together with deep conceptualization, through creation and study, to find a complete solution achieving your final specifications.

CUSTOMIZATION

Development and implementation of multiple possibilities for customizing designs. The customization process will lead to obtaining a final prototype made by experts from the final art and engineering departments.

R&D EXPERTS

Take advantage of the experience, specialization and technical knowledge consolidated in a professional career over the years. Metrohm DropSens researches, designs and develops instrumentation and products that are used worldwide.

HIGH-THROUGHPUT

Benefit from the ability to efficiently and quickly produce your current demand. You can also meet future needs by ordering large volumes of product, avoiding the risks of lack of supply.

METROHM GLOBAL SUPPORT

Count on the superior support that will be with you directly and constantly. Our experts from the R&D department will assist you during the research and development of your application.

SOLUTIONS FOR MULTIPLE APPLICATION SECTORS

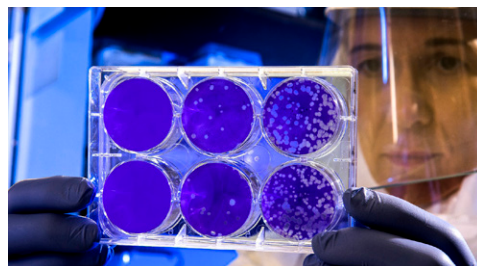

Agricultural.

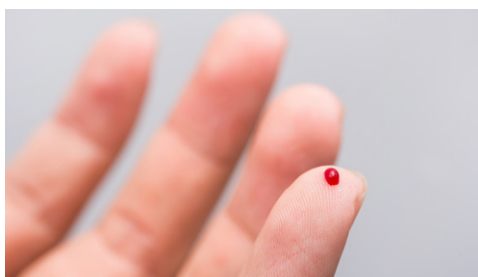

Defence and security.

Environmental.

Biotechnology.

Clinical.

Food analysis.

Metrohm DropSens provides you with simple, portable and wireless devices, electrodes and accessories to use in multiple applications and industries. **All solutions are approved by regulatory certifications ISO 9001**, which guarantees the quality management system, and **ISO 13485** for the 'manufacture of sensors for medical devices'.

Visit the publications section at metrohm-dropsens.com where you can find articles, application notes and white papers organized by reference used.
