1 Purpose

This document describes the fixed bugs and problems as well as improvements in the following new software versions in comparison with the previous versions.

- New: 3.1.20
- Old: 3.1.18

2 New features

None

3   Improvements

None

4 Fixed bugs and problems

Topic	Description
Firmware updates	Fixed an issue with updating firmware. The previous version reported: "Firmware Update Error… The directory is not empty"
Batch and container fix	There was an error when there was no Lot ID present, other fields would not populate.
Sign level 2 window title	The sign level 2 window title incorrectly read: "Sign Level 1"
Spelling	Capitalized "ID" everywhere.

5 Compliance

The new software version fixes an issue with data integrity and thus improves MiraCal compliance with 21 CFR Part 11 and GMP.
