

OMNIS Waste Collector Unit

2.1056.0930

The OMNIS Waste Collector Unit is used to collect the liquid streams entering the waste. The collector's transparent housing allows for visual flow verification of up to 4 liquid streams. If more than 4 channels are fed into the drainage system, then an additional waste collector can be installed on the reagent organizer.

Specifications:

- Number of channels: 4
- Transparent design for visual flow verification

Below, the accessories are grouped into Scope of delivery and Optional accessories.
Please keep this printout at hand for ordering replacement material.
