O2 Lumitrode

The optical sensor for measuring dissolved oxygen (DO) can be used with a 913 pH/DO meter or with a 914 pH/DO conductometer. The measuring principle of the sensor is based on luminescence quenching. The space-saving and maintenance-free sensor is suitable for DO measurement, for example in:
– Water quality control
– Wastewater industry
– Beverage production
– Fish farming

This sensor is supplied with a calibration vessel.
Where necessary, it is easy to replace the measurement cap (O_2 cap) that contains the oxygen-intensive luminophore.
